

Privacy Policy for MomentLab

Effective date: May 15, 2026

MomentLab ("we", "our", or "us") respects your privacy. This Privacy Policy explains how we handle information when you use the mobile application MomentLab.

1. Information We Collect

1.1 Images, Face Data, and Prompts

When you use image generation features, you may choose to provide:

- Photos or selfies
- Text prompts
- Previously generated images, if you use regeneration or editing features

Uploaded photos may contain a person's face. We refer to this as face data only because a face may be visible in the image.

MomentLab does not use facial recognition, face tracking, face scanning, biometric identification, or identity verification technologies. We do not create face templates, faceprints, biometric profiles, or use face data to identify any person.

Images and prompts are used only to create or edit AI-generated images requested by the user.

1.2 Analytics Data

We use Firebase Analytics and Firebase Crashlytics. These services may collect:

- Device information
- App usage data
- Crash logs
- Diagnostic data

This data is used to improve app performance, stability, and user experience.

1.3 Purchases

We use Apple StoreKit to process subscriptions and purchases. We do not collect or store your payment information.

2. How We Use Information

We use information only to:

- Generate or edit images based on user input
- Return generated results to the user's device
- Improve app performance
- Fix crashes, bugs, and technical issues
- Process purchases through Apple StoreKit

We do not sell your data. We do not use your images, prompts, or face data for advertising.

3. Image Processing and Third-Party AI Services

When you use generation features:

1. Your selected images and prompts are sent to our server hosted in the European Union.
2. The request is forwarded to a third-party AI provider, such as OpenAI, for image generation or editing.
3. The generated result is returned to your device.

The data sent to the AI provider may include uploaded photos, visible faces in those photos, text prompts, and previously generated images if needed for regeneration or editing.

Before sending images to the AI provider, the app shows a disclosure and asks for the user's permission.

We do not use uploaded images or face data to train our own models.

4. Data Storage

MomentLab does not permanently store uploaded images, prompts, generated images, or face data on our servers.

Data is processed temporarily only for the time needed to complete the generation request and return the result to your device.

After processing is complete, uploaded images and prompts are not retained by MomentLab.

Third-party AI providers, such as OpenAI, may process submitted data according to their own privacy and data protection policies.

5. Data Retention

Uploaded images, prompts, generated images, and face data are retained by MomentLab only temporarily during processing.

We do not keep face data after the generation request is complete.

Analytics and crash data may be retained in aggregated or diagnostic form to improve the app and fix issues.

6. Data Sharing

We share data only with service providers required to operate the app:

- AI providers, such as OpenAI, for image generation and editing
- Firebase Analytics and Firebase Crashlytics, for analytics and crash reporting

- Apple StoreKit, for subscription and purchase processing

We do not share user data with advertisers. We do not sell user data.

7. User Consent

Before sending user photos, prompts, or images that may contain face data to a third-party AI provider, MomentLab explains what data will be sent, who it is sent to, and why it is needed.

The user must confirm this disclosure before generation continues.

8. Children's Privacy

MomentLab is not intended for children under 13. We do not knowingly collect data from children.

9. Security

We take reasonable measures to protect data during transmission and processing.

10. Your Rights

Depending on your location, you may have rights to:

- Access your data
- Request deletion
- Restrict processing
- Contact us with privacy questions

To make a request, contact us using the email below.

11. Contact
